

## Project: Injection Molding 13000 Ton to Port of Busan, South Korea

Trans-Logistics Management Services, Inc. provided rigging, rail transport, and ocean shipping for this 13000 ton Injection Molding Machine from Crestline, OH to Port of Pennsylvania for export to Port of Busan, South Korea. Customer requested that we move used Injection Molding Machine via rail to the port of Pennsylvania. Customer's original machinery dismantler had improperly packed machine for international shipping. Trans-Logistics Management Services sent rigging and environmental team to do clean up of spilled hydraulic oil and remove contaminants at the port facility. Machinery was then barged to the port of NJ to meet ship to accommodate consignees time line for arrival at the Port of Busan, South Korea.

Trans-Logistics provided packing list and coordinated with ocean shipper all export documentation.
